DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/20/2007 has been entered.

Allowable Subject Matter

2. Claims 157 – 176, renumbered as claims 1 - 20 are allowed over the prior art of the record.

3. The following is an examiner's statement of reasons for allowance: The prior art of the record fails to anticipate or fairly suggest, a system for automatically videoing the activities of one or more participants or objects, as they move about within a predefined area, during a predefined time, comprising: a first set of two or more stationary cameras for generating a first video stream of images that together form a contiguous view of the predefined area throughout the predefined time; a first algorithm operated on a computer system exclusively and solely responsive, to the first stream of video images for simultaneously analyzing the images from each first camera in order to detect the presence of any one or more participants or objects within each and every camera's view, to determine for each detected participant or object its relative centroid two-dimensional location within that view, and to combine this determined information from

each and every first set camera into a tracking database of at least the ongoing centroid two-dimensional coordinates of each one or more participants or objects, relative to the entire predefined area, and a second algorithm operated on a computer system exclusively and solely responsive to the tracking database for dynamically adjusting the current view of each one or more cameras in a second set of movable cameras, distinct from the first set of stationary cameras, wherein each movable camera is automatically directed without operator intervention to maintain an independent view of one or more participants or objects, where the second set of movable cameras outputs a second stream of video images, and where the second stream of video images is not used to either determine any participant's or object's centroid two-dimensional coordinates or to otherwise update the tracking database, as specifies in independent claims 157 and 167, renumbered as claims 1 and 11.

Claims 158 – 166 and 168 – 176, renumbered as claims 2 – 10 and 12 – 20 are allowed with respect to allowable independent claims 1 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
